PRODUCT DESIGN | UX/UI DESIGN | FRONT-END DEVELOPMENT

PROFILE SUMMARY

Interdisciplinary UX/Product Designer with hands-on experience building 0-to-1 digital products across UX/UI design, design systems, and front-end development. Skilled in translating user research into scalable, component-based interfaces and collaborating with engineering and business stakeholders throughout the product lifecycle. Technically fluent in Figma, React, and AI-assisted design and development workflows.

EDUCATION

University of Chicago, Chicago, IL Sep 2025 - Present
M.A., Digital Studies, specializing in human-computer interaction, UX & product design.

- **Coursework:** Human-Computer Interaction, UX/UI, Front-End Development, AI in HCI, Digital Multi-Media.
- **GPA:** 3.93/4.00, Dean's Scholarship. **Organizer** of UChicago Tango Club Events

UC San Diego, San Diego, CA Sep 2021 - Jun 2025
B.A., Interdisciplinary Computing & the Arts Major + Art History

- **Coursework:** UI/UX Design, Design Communication, Virtual Environments, Computer Graphics, Product Design.
- **GPA:** 3.86/4.00, Provost Honors. **Captain** of CFA Soccer Club and **Vice President** of EleFilm Film Club.

PROFESSIONAL EXPERIENCE

L'Oréal, Shanghai, China Jun 2026 - Present
Digital Project Designer/Manager Intern

- **Led end-to-end UX/UI design and front-end development** of the L'Oréal Digital Methodology Encyclopedia (0-to-1), addressing fragmented and inconsistent content across teams by restructuring the information architecture into a four-level taxonomy and reusable component system supporting **100+ product methodologies**.
- **Designed and built the platform using Figma, React, and AI-assisted tools** with human review and validation to ensure productivity and quality, translating user needs and information architecture into human-centered interactive interface.
- **Partnered with designers, developers, and business stakeholders** across **3 iterative design cycles**, resolving UX and technical tradeoffs through usability critique and user research.

Lifang International Digital Technologies Co., Ltd., Chengdu, China Jul 2025 - Aug 2025
UI Designer Intern

- **Delivered 30+ low/high-fidelity prototypes** across the complete UX process — user research, wireframing, prototyping, usability testing, and developer handoff — for culturally-focused interactive products.
- **Built a Figma design system of 20+ components** with a unified information architecture, **reducing design handoff time by 30%** through standardized, reusable UI patterns.
- **Ran agile sprint cycles with 20+ cross-functional stakeholders**, aligning design decisions with product and engineering requirements.

University of Southern California, Los Angeles, CA Jun 2024 - Jul 2024
AI & Human-Centered Design Research Assistant The School of Cinematic Arts

- **Designed an AI-driven HCI framework** around emotional recognition and memory management, building a human-centered interaction architecture through user research, prototype iteration, and usability analysis.
- **Synthesized 100+ behavioral data points into 10+ actionable UX recommendations**, enhancing system responsiveness, emotional resonance, and interaction clarity.

CAMPUS EXPERIENCE

UC San Diego, Envision Arts & Engineering Maker Studio, San Diego, CA Jan 2024 - Jun 2025
Lab/Studio Assistant

- **Supported 300+ students in design and prototyping**, guiding user-centered problem framing and solution development while fostering cross-disciplinary collaboration between engineering and visual design.
- **Instructed 3D printing, laser cutting, and fabrication techniques** to support rapid prototyping and interactive design realization.

KEY SKILLS

- **Design:** UX/UI Design, Interaction Design, Human-Centered Design, Design Systems, Wireframing, Prototyping, User Research, Usability Testing, XR/VR, HCI
- **Front-End:** React, HTML, CSS, React, Svelte, AI-assisted Development
- **Programming:** Python, Java, JavaScript, C++, C#, SQL
- **Software:** Figma, Photoshop, Illustrator, InDesign, Blender, Rhino, Sketch, Unreal Engine, Unity
